ROPE ACCESS

IRATA ROPE ACCESS · OFFSHORE AND ONSHORE

INSPECTION AT HEIGHT, WITHOUT THE SCAFFOLD.

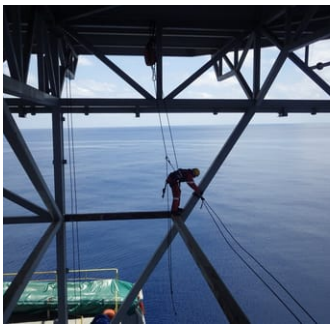

More than 20 years on rope access projects for offshore maintenance. Our IRATA Level 2 and Level 3 rope access technicians reach jacket legs, bracing, underdecks and risers, and carry out the NDT, inspection and maintenance while they're there.

IRATA LEVEL 2 & 3 | 20+ YEARS OFFSHORE | NDT ON ROPES | INSPECTION & MAINTENANCE | AS 4488 | WORK & RESCUE BOATS

20+ YEARS ON ROPES

INSPECTORS WHO CAN GET THERE, TECHNICIANS WHO CAN TEST IT.

Our rope access technicians are NDT and inspection people first. They rig in, test, inspect or repair, and rig out, with no scaffold to build or strip and very little disruption to the plant around them.

Jacket bracing, over open water.

Underdeck steelwork.

Coating repairs on ropes.

Hard-to-reach pipework and valves.

NDT AT HEIGHT
UT thickness, PAUT corrosion mapping, MT, PT, eddy current through coatings and visual, on the rope.

STRUCTURAL & SPLASH ZONE INSPECTION
Jacket members, nodes, bracing, risers and supports, inspected and photographed close up.

MAINTENANCE
Surface preparation, coating touch-up and minor repairs, done by the same team on the same drop.

WHARVES & JETTIES
Surveyed work and rescue boats for jetty, wharf and marine work around Darwin.

IRATA CERTIFIED

SUPERVISED BY LEVEL 3, TWO ROPES EVERY TIME.

IRATA LEVEL 3
SUPERVISOR
Responsible for the whole worksite: rope access plan, rigging, rescue plan and the team.

IRATA LEVEL 2
LEAD TECHNICIAN
Rigs working and backup ropes, carries out rescues and leads the work on the rope.

NDT & INSPECTION
QUALIFIED ON THE ROPE
Technicians hold their NDT and inspection tickets as well as their rope access level.

TWO ROPES
A working line and an independent backup line on every technician.

RESCUE PLAN
A rescue plan and rescue kit in place before anyone goes over the edge.

TO STANDARD
Worked to AS 4488 and IRATA's code of practice.

SMALL FOOTPRINT
No scaffold, fast to mobilise, little impact on operations.

20+ YEARS
Rope access projects for offshore maintenance

LEVEL 2 & 3
IRATA certified rope access technicians

2 ROPES
Working and backup line, every drop
